

Approximately only 18% of South Africans have access to the internet whilst over 70% own a cell phone. In recognising the growth of cellular technology designed to meet the demands of the consumer, Absalom Systems has developed a bulk SMS functionality which incorporates bulk email.

The introduction of bulk SMS and email means that you are able to keep in contact with all your employees at any given time with the minimum of fuss.

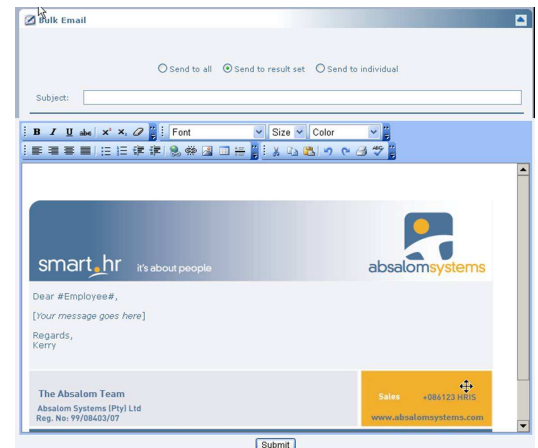

Users are able to send bulk SMS and emails directly from the ABSALOM Employee Self Service (ESS) module to all employees in their access-to list. Employees have access to their personal details on the ESS which they can update at any given time meaning that cell phone numbers and email addresses are current. The outcome of leave notification can be sent directly to the employee.

A comprehensive log is kept of all SMS's and emails sent using the bulk functionality and reports can be generated using this information.

The Absalom Administrator controls access to the functionality through the ESS security templates to prevent any unauthorised personnel sending SMS's or emails.

The Bulk SMS and Email functionality allows the users ad-hoc workflow notification but continuous development means that in the future, users and employees will be able to do many Absalom transactions via their cell phones.

Smart HR has recently introduced a Pay-as-you-use module which will notify you on a monthly basis of your organisation's usage.

ABSALOM Bulk SMS and Email allows you to keep in contact with your employees anytime and any place where you have access to the internet.

PRICING (Prices exclude VAT @ 14% and are pre-paid)
